

# CANADIAN PACIFIC P-2e MIKADO

Beginning with P2e sub-class 5360 one-piece cast bed and a multiple throttle were major improvements. The most noticeable difference in appearance came with the introduction of semi-streamlined engines as in other classes that distinguished CPR power.

Sunset Models will be building the P-2e, a work horse for the CPR for both freight and passenger duty.

Also just announced is "THE CANADIAN". See the brochure.
